Ayushi Nasare

Nagpur, India
aayushi26nasare@gmail.com — +91-7588819703 — GitHub — LinkedIn

Profile

Dynamic Full Stack Developer with hands-on experience in backend development, web applications, and IoT-based intelligent systems. Strong foundation in Java, Python, and C with practical exposure to React and database technologies. Passionate about solving real-world problems using AI, IoT, and scalable web solutions.

Education

B.Tech in Computer Science and Engineering - Expected 2028
Symbiosis Institute of Technology, Nagpur
Higher Secondary (Class XII) - 2024
St. Paul Junior College, Nagpur
Secondary School (Class X) - 2022
Somalwar School Maa Umiya Branch, Nagpur

Technical Skills

Languages: Java, Python, C, C++**,** JavaScript, My SQL(CRUD, Joins, Normalization**)**
Web Development: HTML, CSS, React,js, Tailwind CSS
Backend: Node.js(basic), REST APIs
Database: MySQL, DBMS
Tools: Git, GitHub, VS Code, Arduino IDE, Linux (basic commands)
Concepts: OOP Concepts, Data Structures and Algorithms, Operating Systems, DBMS, Computer Networks
Other: IoT, OpenCV, API usage(basic), Object Detection basics, Data handling, Debugging

Experience

Kalika Technological System
20 May 2026 – 20 June 2026
Full-Stack Developer Intern
Contributing to frontend development and application logic implementation.
Working with API for seamless integration and communication between services.
Managing data handling, processing, database interactions efficiently,
Assisted in integrating backend functionalities.
Debugged and resolved technical issues to improve system reliability.
Optimized application performance for better efficiency and scalability.

Certifications

RedHat: Red Hat System Administration I (RH124 – RHA) – Ver. 10
RedHat: Python Programming with Red Hat (AD141 – RHA) – Ver. 9.0
Infosys: Data Structures and Algorithm using Python – Part 1

Projects

Smart Traffic Light Controller (AI + IoT)

- Developed an intelligent traffic system aligned with SDG 11 to optimize signal timing based on real-time vehicle density.
- Used Object Detection (YOLO/OpenCV) to identify traffic levels via camera input.
- Integrated sensors and microcontroller to dynamically adjust signal duration.
- Reduced congestion by automating decision-making using AI and IoT technologies.

Smart Attendance Management System

- Designed a digital attendance system with dashboard interface for tracking student records.
- Implemented features like real-time attendance monitoring, data storage, and report generation.
- Applied DBMS concepts for efficient data handling and retrieval.

AgriConnect Platform

- Built a platform connecting farmers directly with retailers and vendors.
- Eliminated intermediaries to improve pricing transparency and communication.
- Focused on user-friendly interface and real-time interaction.
- Focused on improving supply chain efficiency using web technology.

Travel Manager Application

- Designed a travel planning application with features like itinerary management and trip tracking.
- Implemented structured UI to improve user experience and organization of travel details.

Strengths

- Strong problem-solving and debugging skills
- Ability to quickly learn new technologies
- Team collaboration and communication
- Analytical thinking

Languages

English, Hindi, Marathi, German(Beginner)
